

Simranjeet Singh

Senior Fullstack Software Engineer

smrnjeet.dev@gmail.com | jeet22.xyz | github.com/smrnjeet222 | linkedin.com/in/smrnjeet222

Professional Summary

Senior Fullstack Engineer with 5+ years of experience building **user-facing product interfaces** and **scalable backend services** across **TypeScript, Python, and Go**. Proven track record of **end-to-end ownership**: from collaborating with designers on **responsive frontends (React, Next.js, React Native)** to designing **microservices and API layers (Node.js, FastAPI)**. Experienced in building and deploying **AI agent runtimes, custom MCP servers, and RAG pipelines** with structured validation loops.

Work Experience

Senior Software Engineer – (Backend systems, Product Design, Platform Infrastructure)
MON Co.

Dec 2023 — Present
Remote, Singapore

- Backend & Scaling:** Scaled distributed backend systems with database integration supporting thousands of concurrent users.
- Technical Leadership:** Guided cross-functional architectures, authored documentation, and set standards to improve quality.
- Media & AI Pipelines:** Built background processing engines and asset validation pipelines using LLMs and structured parsing.
- Reusable Logic:** Designed centralized logic layers and metadata APIs reused across multiple SSR pages and client runtimes.
- Database Tuning:** Optimized PostgreSQL schemas, index designs, and cache-first Redis pathways, reducing latency by 60%.
- Auth & Identity:** Shipped unified authentication and session layers with schema validation, centralizing user onboarding.
- Async Execution:** Shipped async execution networks with retries, timeouts, and distributed transaction state recovery.

Senior Software Engineer → Tech Lead – (React Native, Fullstack & Mobile, Team Lead)
Pop Social

Jan 2023 — Dec 2023
Remote, Dubai

- Team Leadership:** Led a 4-engineer team, collaborating with design to build and ship user-facing products with 50K+ MAU.
- API Abstraction:** Shipped custom auth/session abstractions and developer-facing APIs for reusable identity management.
- Real-Time Systems:** Integrated WebSockets and webhook listeners, resolving data synchronization bottlenecks under load.
- Web Performance:** Optimized render paths, bundle sizes, lazy loading, and code splitting, boosting session times by 35%.
- State Management:** Managed complex client state at scale using Zustand, decoupling user profiles and feed services.

Fullstack Engineer – (TypeScript/Node.js, PostgreSQL, APIs, Analytics)
Coxion

Jul 2022 — Dec 2022
Gurgaon, India

- Marketplace APIs:** Built and scaled REST/GraphQL APIs and internal admin dashboards supporting over 10K active users.
- PostgreSQL Migration:** Migrated MongoDB to PostgreSQL, designing schemas and indexes to optimize query performance.
- Data Pipelines:** Unified event indexing pipelines, eliminating API bottlenecks and improving database consistency.
- SRE & CI/CD:** Cut MTTR 50% using observability logging, alert triage, and automated GitHub Actions CI/CD pipelines.

Founding Fullstack Engineer – (React.js, TypeScript, Rust, Fullstack & Tooling)
Cykura

Jul 2021 — Jun 2022
Remote

- Systems Programming:** Built Rust backend tools, profiling and benchmarking code to optimize memory allocation under load.
- Complex Modeling:** Translated complex math models into clean typed models and user-facing interfaces with design teams.
- State Isolation:** Separated ingestion loops, read models, and UI state, improving failure isolation in production.

Skills

Languages & Tools: TypeScript, Python, Go, SQL, Solidity, Rust (familiar), git, tmux/nvim, claude-code, opencode, ollama
Frontend: React (Next.js), React Native (Expo), Zustand, TanStack Query, Tailwind CSS, Storybook, WebGL, WASM, Electron, Tauri
Backend: Node.js (NestJS/Express), FastAPI, LangChain, Go (Fiber), REST, GraphQL, gRPC, WebSockets, Microservices
Infra & Ops: AWS (ECS, Lambda, RDS), Docker, PostgreSQL, Redis, Kafka, CI/CD, Grafana, PostHog, Jest, Vitest, Playwright

Featured Projects

NextFlow — Real-time DAG Workspace (React, Next.js, Zustand)
Agent Workflows: Shipped a real-time DAG workspace editor using React Flow and Zustand for multi-step agent runs.

github.com/smrnjeet222/nextflow

Education

B.Tech, Computer Science (CSE)
Guru Gobind Singh Indraprastha University (IPU), Delhi

2018 – 2022
CGPA: 8.6
