Professional Summary

Senior Fullstack Engineer with 5+ years of experience building **user-facing product interfaces** and **scalable backend services** across **TypeScript, Python, and Go**. Proven track record of **end-to-end ownership**: from collaborating with designers on **responsive frontends (React, Next.js, React Native)** to designing **microservices and API layers (Node.js, FastAPI)**. Experienced in integrating and building **AI agent systems, RAG pipelines**, and **workflow automation** in production. High-agency collaborator who ships robust features and optimizes system performance.

Work Experience

Senior Fullstack Engineer – (Backend systems, Product Design, Platform Infrastructure) Dec 2023 — Present
MON Co. Remote, Singapore

- **High-traffic platform**: scaled systems supporting **\$30M+ user deposits** and thousands of concurrent users in production.
- **Agent Runtimes**: designed and built **AI agent loops** and **tool-calling** with **structured output validation** to prevent hallucinations.
- **MCP Orchestration**: built **custom MCP servers** and tool integration layers with rate-limiting, retries, and checkpoints.
- **Search & Retrieval**: implemented **RAG + vector search** over metadata, exposing search interfaces via **MCP interfaces**.
- Reduced API latency by **60%** via **cache-first Redis, indexing strategy**, and database query optimization under high load.
- Built **unified identity and auth layer** with **schema validation**: resolved authentication fragmentation across services.
- Designed **async execution systems**: batching with **retries & timeouts**, distributed state management, and failure recovery.
- Collaborated daily with product, design, and ops teams to ship features to production in rapid daily cycles.

Senior Fullstack Engineer → Tech Lead – (React Native, SocialFi, Mobile Platforms) Jan 2023 — Dec 2023
Pop Social Remote, Dubai

- Led **4-engineer team** on AI-powered social app, collaborating with designers to refine user-facing features (**50K+ MAU**).
- Migrated to in-house **auth/session layer** and **developer-facing APIs** (Phinx) for reusable identity management.
- Built integrations (OAuth, webhooks, schema mapping) and resolved data synchronization bottlenecks under peak load.
- Boosted session time **35%** via frontend query caching and mobile render/state optimization.
- Decoupled user profiles and graph services using **microservice patterns**, improving fault tolerance and deploy velocity.

Fullstack Engineer – (TypeScript/Node.js, PostgreSQL, APIs, Analytics) Jul 2022 — Dec 2022
Coxelion Gurgaon, India

- **Digital collectibles platform**: built and scaled marketplace APIs and **internal admin dashboards** supporting **10K+ DAU**.
- Migrated from MongoDB to **PostgreSQL**: implemented advanced **indexing strategy** & design, optimizing query performance.
- Unified **external event indexing** pipelines: eliminated API bottlenecks, improved consistency across systems.
- Cut MTTR **50%** via **observability-first** logging, alert triage, and automated CI/CD pipeline improvements (GitHub Actions).

Founding Fullstack Engineer – (React.js, TypeScript, Rust, DeFi) Jul 2021 — Jun 2022
Cykura Remote

- **0→1 Product Delivery**: Joined as **Founding Engineer** to build concentrated-liquidity swap UI and **Rust-based** backend tools.
- Adapted complex math models into clean **typed data models** and user-facing **product interfaces**, collaborating with designers.
- Implemented data analytics pipelines and **serverless execution environments** for product metrics.
- Separated **ingestion, read models, and UI state**: improved **failure isolation** and debuggability of systems in production.

Skills

Languages: Python, TypeScript, Go, SQL, Solidity, Rust (familiar)
Fullstack & APIs: React(Next.js), React Native(Expo), Node.js, NestJS, FastAPI, Fiber, REST, GraphQL, gRPC, Electron, Tauri
Agents & AI: Agent harnesses, LangChain/LangGraph, Pydantic AI, MCP servers, RAG pipelines, multi-model LLM orchestration
Infra & Ops: AWS, Docker, Cloudflare, PostgreSQL, Redis, Kafka, GitHub Actions, CI/CD, Grafana/Posthog, Jest, Vitest, Playwright

Education

B.Tech, Computer Science (CSE) 2018 – 2022
Guru Gobind Singh Indraprastha University (IPU), Delhi CGPA: 8.6
